# Introduction

## Student Challenge

Students often struggle to gain real-world experience during university.

## Market Demand

Startups and small businesses need affordable, skilled help for short-term tasks.

## Existing Gap

There is no dedicated platform connecting students with freelance micro-jobs.

## Our Solution – *SkillMatch*

*SkillMatch* aims to fill this gap by matching student skills with real freelance projects.

## Core Impact

Empowers students with experience and income while offering businesses affordable, skilled talent for short-term needs.

# Project Objectives (SMART Goals Overview)

S

Specific

M

Measurable

A

Achievable

R

Relevant

T

Time-Bound

# S-Specific : Platform Features and Functionality

**Goal:** Define clear, trackable indicators to assess platform impact and effectiveness.

## Student Registration & Skill Profiling

Allow students to sign up, create profiles, and list their skills, interests, availability, and project preferences.

## Freelance Job Browsing & Filtering

Enable students to explore freelance micro-jobs using filters like skill match, duration, and payment range.

## Application & Proposal Submission

Provide a system for students to apply to projects by submitting short proposals or expressions of interest.

## Built-in Communication Tools

Integrate messaging or commenting features to facilitate real-time communication between students and clients.

# M-Measurable : Performance Metrics for the Pilot Phase

**Goal: Define clear, trackable indicators to assess platform impact and effectiveness.**

## User Adoption

Onboard at least 50 students with complete skill profiles and attract 20+ freelance job postings from startups or departments during the pilot.

## Engagement & Matching

Achieve 10 or more successful matches, where students are hired, complete projects, and receive feedback from project owners.

## User Satisfaction

Gather feedback through surveys and aim for at least 80% overall satisfaction from both students and clients.

## Pilot Timeline & Evaluation

Complete the pilot within a 3-month period, ensuring all key metrics are tracked and evaluated for future improvements.

## A-Achievable : MVP Development Plan

**Goal: Develop and deploy a Minimum Viable Product (MVP) that can be tested within a university environment using accessible tools and resources.**

## R-Relevant : Why SkillMatch Matters?

**Goal:** Align the platform's impact with educational, entrepreneurial, and technical goals of both students and institutions.

Enhances Student Portfolios

Fosters Self-Reliance

Solves Real Needs

Aligns with course focus on IT and entrepreneurship.

# T-Time-bound : Timeline and Workflow

**Goal: Develop, Deploy, and Assess within a 8-weeks timeframe.**

**Week 1-2**

Planning and Requirement Gathering

**Week 3-4**

Design and develop the front-end, back-end and core features

**Week 5-6**

Perform internal testing and bug fixing

**Week 7-8**

Evaluate from feedback and final presentation

## Expected Outcome

**50+ student profiles**

**20+ freelance jobs posted**

**10+ successful matches**

**80%+ user satisfaction from feedback**

**Real-world project experience**
